What type of car do you have?

Identify your car

START

We'll use your Vehicle Identification Number (VIN) to identify your specific car. A VIN usually consists of 17 letters and numbers and has a barcode. It can be found in a few spots:

1

#### Driver-Side door

With the door open, look on the edge of the door or doorpost (where the door latches when it's closed).

2

#### Driver-Side dashboard

Stand outside the car and look through the windshield at the bottom corner of your dashboard.

3

#### Documentation

Check your car title, registration, or insurance documents.

If you still can't find your VIN number, check your car manual or manufacturer's website for instructions.

Let's setup your listing photo's

## Add photos to your listing

Photos help mechanics imagine what could potentially be wrong with your vehicle. It is better to post as many photos as possible or the issue so give a better idea of what's wrong to our technicians.

Add photo(s)

Great photos attract clients and/or potential mechanics. Check out some tips to help highlight your vehicle.

5

X

# 5.4

Great photos attract clients and/or potential mechanics. Check out some tips to help highlight your vehicle.

### Showcase your vehicle with some great photos

Some easy tips to get great photos of your vehicle:

Take photos in landscape mode to capture as much of your vehicle as possible. Shoot from corners to add perspective.

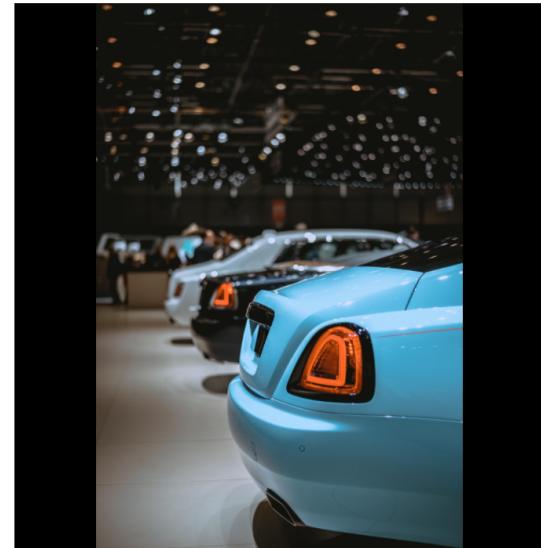

Car/Vehicles look best in natural light. If it's daytime, capture the image in a well-lit area with some sunshine. Avoid pictures at nighttime especially using flash.

Include all spaces of your vehicle inside and out if need be, to give an accurate description of what is wrong with your vehicle.
